

AIRFLEX™ IMPACT COMBAT KNEE PAD

The **AIRFLEX™ IMPACT COMBAT KNEE PAD** enhances impact protection, comfort and flexibility by incorporating dual-density foam, a unique impact absorbing cap structure, and an expanded **VELCRO®** attachment area. These pads are specifically tailored to integrate with all styles of our **COMBAT PANTS™**.

FEATURES:

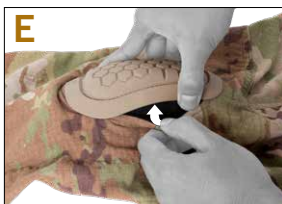

- Flexible cap for mobility and durability
- Unique cap design absorbs impact energy
- Dual-density foam body for greater comfort and protection
- Vented body for breathability and reduced weight
- Compatible with all styles of our **COMBAT PANTS™**
- Extended **VELCRO®** area for enhanced security
- Berry compliant, patented, and made in America

INSTALLATION INSTRUCTIONS

1 Open the kneepad pocket (A) and insert the pad into the pocket downward (B). Seat the lip of the cap over the bottom edge of the pocket.

2 Squeeze the top of the pad and fully insert into the pocket (C). Flatten the cap and check that the lip covers the top edge of the pocket (D), and that the pad fills the pocket without rolling.

3 Work the sides of the pocket under the lip of the cap to engage **VELCRO®** (E). The cap should cover the edges of the pocket opening (F). This keeps out dirt and holds the pad securely in the pant leg.
